MILESTONE INSPECTION – PHASE 1 STRUCTURAL INSPECTION REPORT

July 25, 2024

The President Of Palm Beach-A Condominium, Inc.
C/o Monique Videla, General Manager
2505 South Ocean Boulevard
Palm Beach, Florida 33480

For: President of Palm Beach
2505 South Ocean Boulevard
Palm Beach, Florida 33480

Dear Ms. Videla:

Inspection date(s): 7/24/24

At the Association's request, we performed a Phase I Milestone inspection at the above referenced condominium property. The inspection included visual inspections of habitable and non-habitable areas, including major structural components. We inspected garage areas, walkways, interior areas, exterior areas, stairways, and miscellaneous rooms. Units inspected through the interior were 301, 302, 502, 305, 306, 409, 212, 216, 317 and 417.

The building is approximately 65 years old, built in 1959. The building is a seven story concrete framed residential structure with masonry infill. There are 6 residential stories, 16 vertical stacks, and 96 units. The first floor consists of a lobby, gym, and common room area with open garage parking areas on both sides. The second through seventh floor are residential units with a private balcony. The residential units have exterior walkways with precast railing systems. The building has four interior stairwells, three elevators, and 2 laundry rooms on each floor. A pool is located in a central area at the rear of the building.

The purpose of the inspections is to provide a qualitative assessment of the structural conditions of the building, identify if there is substantial structural damage, unsafe or dangerous conditions, locations needing repair, if remedial or preventive repairs are recommended, and to determine if additional Phase II inspections are needed.

"Milestone Inspection" means structural inspections of load-bearing elements and the primary structural members and primary structural systems for the purposes of attesting to the adequacy of the structural components of the building and, to the extent reasonably possible, determining the general structural condition of the building as it affects the safety of such building, including a determination of any necessary maintenance, repair, or replacement of any structural component of the building. It is not to determine if the condition of an existing building is in compliance with the Florida Building Code or fire safety codes.

The President of Palm Beach - A Condominium, Inc.

A Milestone Inspection consists of two phases. Phase I is visual inspections and a qualitative assessment of the structural conditions to determine if there are signs of structural deterioration. If there are no signs of structural deterioration, then Phase II inspections are not required. Phase II inspections are additional inspections needed to fully assess areas of deterioration in order to determine if the building is structurally sound and to recommend a program for repairing damaged portions of the building. Phase II inspections may include destructive or non-destructive testing at the discretion of the inspector.

“Substantial structural deterioration” means substantial structural distress or substantial structural weakness that negatively affects a building’s general structural condition and integrity. This does not include surface imperfections such as cracks, distortion, sagging, deflections, misalignment, signs of leakage, or peeling of finishes unless the licensed engineer performing the phase one or phase two inspection determines that such surface imperfections are a sign of substantial structural deterioration.

Material Findings:

1. No substantial structural deterioration
2. No dangerous or unsafe conditions
3. No remedial or preventive repairs recommended.
4. No items require current further inspection.

Photos of typical conditions attached as Exhibit A.

Recommendations:

1. No repairs needed now.
2. Re-inspect approximately every five years. Continue to plan for inspections and repairs projects as needed.
3. Call engineer if any obvious unsafe conditions become apparent or any new questionable conditions or problems develop.

If there are any questions please let us know.

Sincerely,

Donald Chalaire, PE

Dear Ms Videla:

At the Association's request, we performed Phase I Milestone inspections at the above referenced condominium property. The purpose is to provide a qualitative assessment of the structural conditions of the building, identify if there is substantial structural damage, unsafe or dangerous conditions, locations needing repair, if remedial or preventive repairs are recommended, and to determine if additional Phase II inspections are needed.

The inspection included visual inspections of habitable and non-habitable areas, including major structural components. We inspected walkways, interior and exterior areas, stairways, and miscellaneous rooms, and through-unit inspections at several units. The building is about 65 years old, built 1959, with 7 stories, 16 vertical stacks, 96 units. The first floor consists of a lobby, gym, and common room area with open garage parking areas on both sides. The second through seventh floor are residential units with a private balconys. The building is concrete frame with masonry infill and a flat roof system. The Association reported miscellaneous repairs projects over the years.

We issued a Phase I report, referenced above. This is a Summary Report of Material Findings and Recommendations.

Material Findings:

1. No substantial structural deterioration. No dangerous or unsafe conditions.
2. No remedial or preventive repairs recommended.
3. No items require current further inspection. Phase II inspection is not needed.

Recommendations:

6. **DOGS and PETS** Unit owners, lessees, guests and visitors are not permitted to keep or bring a pet on to the premises including the pool or dock areas.

ESA and SERVICE ANIMALS: While emotional support and service animals are permitted on all parts of the Association property the Association requests that the Owner, Tenant or Guest be courteous of others and avoid areas or situations which may cause other owners, tenants, occupants and/or guests, discomfort or create unsanitary conditions.

A disabled/handicapped Owner, Tenant or Guest must notify the Association of the request for a reasonable accommodation to allow a service and/or support animal in this community and the common areas in the community and provide adequate documentation supporting the request in compliance with the Florida and federal Fair Housing Acts. This applies to Owners, Tenants, and/or Guests visiting or residing on the property.

It is the Owners' responsibility to ensure that Owner(s), Tenant(s), and Guest(s), advise anyone who may require a reasonable accommodation to comply with the stated guidelines herein, prior to bringing an animal on the property, and to provide the Association with sufficient time (**No less than 30 days prior to taking possession**) to conduct a meaningful review of the request.

Should a request for a reasonable accommodation to the pet restriction be granted, the Association reserves the right, pursuant to Florida law addressing nuisances and/or safety and health concerns, to withdraw this approval at any time should the emotional support/service animal become a nuisance to, or a threat to the health and safety of others, which includes, but is not limited to: excessive barking; biting; aggressive behavior (including nipping and lunging); attacking persons or other animals; animal Owner's, Tenant's or Guest's failure to immediately and properly dispose of excrement or waste (so long as the disability permits it); failure to comply with all state and local ordinances and statutes related to the animal (including any required licenses or tags); not maintaining the animal on a maximum, non-retractable six foot hand held leash at all times when outside of the unit so long as the disability permits the use of a leash; insect/extermination problems; sanitation/odor problems; and/or Owner's, Tenant's or Guest's inability to control the animal. If the requesting party is unable to use a leash because of the disability, the handler must have control over the animal by voice control or some other reliable means. This requires the Owner, Tenant or Guest to ensure that the animal is properly controlled. The animal is not permitted on the property of any other owner or tenant. Additionally, the approval of the animal may be withdrawn if the requesting party is no longer disabled/handicapped. The animal may not be left unattended when out of the Owner's or Tenant's Unit and it may not be tied or tethered to any objects on the property. The Owner, Tenant or Guest must always maintain complete control over the leashed animal, when outside the unit. Should the animal become a nuisance to others, the Owner, Tenant or Guest will be asked to remove the animal from the premises and may be prohibited from bringing the animal back. Additionally, fines may be levied for failing to abide by these restrictions.

The Owner, Tenant or Guest is required to provide updated medical information concerning his/her disability/handicap (if the disability/handicap is not permanent); current and annual vaccination, immunization and veterinarian records for the animal; and to maintain all required Palm Beach County animal tag(s)/license(s). Owner, Tenant

or Guest is solely responsible for any and all damage caused by the animal, whether to person or property.

To clarify, in addition to those restrictions stated above, should an emotional support animal and/or service animal be approved, the animal must be walked on a non-retractable leash providing no more than six (6) feet of slack and may not be tied or tethered to any object on the property. The owner of the animal must immediately pick up and dispose of all animal waste and excrement. Owner, Tenant or Guest is responsible for supplying his/her own waste removal bags.

A violation of any of these reasonable restrictions is also grounds for immediate revocation of any approval requiring the immediate and permanent removal of the animal and/or the levying of fines.

An approval of an emotional support animal and/or service animal is limited to the requesting party and his/her needs. If the requesting party no longer resides in this community, is no longer visiting or temporarily vacates the property, for whatever reason, the emotional support/service animal is not permitted to remain. The approval of an emotional support/service animal does not apply to a residence generally, but rather, is only approved for a particular person. If that person is not in residence, the animal may not be in residence.

7. POOL AREA

- (a) In compliance with *Florida Department of Health Pool Code* a **shower must be taken**, and grease or oil-based suntan lotion removed **each time before entering the pool**. A towel should be placed on pool lounge or chair to avoid staining the plastic slats of the pool furniture. The shower enclosure or gazebo may not be used as a dressing room.
- (b) Use of the pool is restricted to the hours between 9:00 A.M. and dusk.
- (c) As a courtesy to others using the pool after you leave, lounges, chairs and tables should be returned to their original positions and the pool umbrellas should be closed to avoid wind damage. Make sure the guard rope across the pool is in place before leaving.
- (d) In compliance with *Florida Department of Health Pool Code* - No food or drink is permitted at poolside. Ball playing, running, shouting, jumping in pool and excessive noise is prohibited.
- (e) Any persons unable to swim should be properly supervised by a competent swimmer.
- (f) No diapers allowed in pool (children or adults), unless specifically made for use in water.
- (g) Use of the pool is strictly at the swimmer's risk and responsibility.
- (h) **Seating accommodation around the pool is available on a first-come first-served basis only. It is not permitted to make reservations for persons not present.** Furniture may not be removed from or taken to the pool area.
- (i) **No one may use the center elevator or center elevator lobbies while in bathing attire.** It is prohibited to enter any elevator or elevator lobby in bare feet or while wet enough to drip water on to the flooring, or to sit upon Condominium seats outside the pool area while in wet clothing.
- (j) A life ring is positioned prominently at the pool area for use in an emergency. A guard rope divides the deep end from the shallow end of the pool and it is dangerous to detach this if there are others in the water.
- (k) A telephone in the gazebo is connected to the front desk, for emergencies.
